2025

"Every project begins with an idea, but what makes it exceptional is the process behind it. We combine bold creativity with rigorous attention to detail, ensuring that each design reflects both our client's aspirations and our own philosophy of excellence. With every step, we aim to build spaces that inspire, connect, and endure."

Founded on trust and refined through design, **OWA** is the architectural and engineering studio where function finds its perfect form. Got you curious yet?

At **OWA Engineering Consultants**, we don't just design buildings — we bring ideas to life. Established in 2023 and based in Dubai-United Arab Emirates, we offer a full range of services that cover everything from the first sketch to the final handover. Whether it's a brand-new structure or giving an old space a fresh purpose, we're with you every step of the way.

Architecture is at the heart of what we do. We focus on creating spaces that not only look good but also work beautifully for the people who use them. From sleek modern villas to large-scale commercial developments, every design is tailored to the client, the context, and the environment.

| We don't just design buildings — we create spaces that inspire, endure, and truly make a difference efficient

How we get it all done?

| From sketch to skyline, we build with patience — one line, one layer, one level at a time.

When it comes to **structural engineering**, we make sure everything stands strong. Our team takes care of the technical side — making sure your building is safe, efficient, and built to last. We collaborate closely with architects to ensure the design and structure work perfectly together.

Our **MEP** (Mechanical, Electrical & Plumbing) services keep your building running smoothly. We handle the behind-the-scenes systems — air conditioning, lighting, power, water — all designed with energy efficiency and user comfort in mind.

Greetings

At OWA Engineering Consultants, we shape more than structures — we craft experiences in space and light. Our work blends form and function, tradition and innovation, to bring timeless architecture to life.

We know that great ideas need great execution, which is why our **project management** team makes sure everything happens on time and within budget. From planning to site supervision, we keep things organized, clear, and moving forward — so you don't have to stress.

Navigating Dubai's approval process can be tricky, but our **authority liaison** experts handle all the paperwork and coordination with local authorities for you. We know the systems, the standards, and the right people — so your project keeps moving without delays.

We also love **renovating** older buildings. Whether it's a heritage home or a tired office space, we specialize in turning outdated spaces into functional, modern designs — all while preserving their original charm where needed.

And finally, our **interior and landscape** design teams take care of the finishing touches. From interiors that reflect your style to outdoor spaces that feel like a natural extension of your building, we make sure every corner is thoughtfully designed and well-executed.

“We don't just design buildings — we define skylines. At **OWA**, every line we draw is a statement of purpose, power, and precision.”

Every space begins as an idea — a vision shaped by purpose and refined through thoughtful design. From the first pencil stroke to the final site touches, the process balances creativity with precision. It's not just about meeting requirements; it's about exceeding expectations, solving problems before they arise, and creating environments that inspire and endure.

Designing a space means understanding the people who will use it — how they move, connect, and live within it. It requires sensitivity to local climate, culture, and context, resulting in solutions that are both innovative and respectful. Architecture is a collaborative effort where architects, engineers, planners, contractors, and clients come together to transform ideas into reality.

Behind every building lies technical mastery and attention to detail. Structural strength, mechanical systems, sustainability, and aesthetics must integrate seamlessly for a space that's beautiful, functional, and safe. This demands continuous problem-solving and adaptability throughout the project.

Great buildings are crafted with care and intention. They become places where memories form and communities grow, contributing to the identity of their surroundings. This enduring impact drives us to uphold the highest standards in every project, blending innovation with tradition to create architecture that lasts for generations.

Company Value

At the core of every project and relationship lies a set of values that guide our actions, decisions, and vision. These principles shape who we are as a company and how we deliver excellence every step of the way.

Vision

| “Design with respect for today, responsibility for tomorrow.”

Our core values are the guiding principles that shape every project and partnership. They reflect who we are, how we work, and the standards we uphold. Through integrity, innovation, collaboration, and a relentless focus on quality and sustainability, we strive to create spaces that inspire and endure. These values ensure that we not only meet but exceed expectations, building trust and delivering lasting impact with every design.

Mission

- **Integrity:** Acting with honesty, transparency, and fairness in all we do.
- **Innovation:** Embracing creativity and technology to push boundaries.
- **Collaboration:** Working together openly to achieve shared success.
- **Quality:** Committing to excellence in every detail and every stage.
- **Sustainability:** Designing responsibly for today and tomorrow.
- **Customer Focus:** Listening carefully to turn vision into reality.
- **Adaptability:** Staying flexible and resilient to overcome challenges.
- **Respect:** Valuing people, cultures, and perspectives in every interaction.

Milestone

"Every milestone marks a chapter of growth, innovation, and unwavering commitment. Together, we build not just structures, but lasting legacies."

2022

the beginning

founded by a small team of design-driven professionals, we began in a shared co-working space in Business Bay, dubai with limited resources but a clear vision — to deliver thoughtful, modern architecture in a highly competitive market. the early phase was marked by late nights, bold ideas, and hands-on involvement in every detail. we focused on building strong client relationships, delivering quality over quantity, and proving that great design doesn't depend on size, but on intent. our first few projects, though modest in scale, laid the foundation for our design philosophy and professional ethos.

2023

building momentum

building on our early foundation, 2023 marked a year of growth and momentum. with successful project deliveries, we gained client trust and began expanding into larger residential, commercial, and interior projects. our team grew, bringing new skills and energy, and we moved into our first dedicated office space — a key milestone in our journey. we refined our design process, strengthened collaborations with consultants and contractors, and focused on consistency, creativity, and client satisfaction. this year helped shape our identity as a reliable, quality-driven practice with a growing presence in the industry.

2024

larger vision, larger space

2024 was a year of purposeful growth. with a steady increase in projects and team size, we moved into a larger office in dubai silicon oasis — a reflection of our expanding vision. our portfolio evolved to include more complex residential and commercial works, with a stronger focus on detail, functionality, and context. we enhanced our design workflows, embraced better digital tools, and streamlined project coordination. this phase reinforced our identity as a committed, client-focused practice with the capacity to deliver thoughtful and efficient design solutions consistently and reliably.

2025

Building the Future

2025 was a year of dynamic expansion. Despite global instability, we maintained strong market momentum, grew our project portfolio, and diversified into sustainable designs. We welcomed new talents and created a dedicated technical team in India, boosting expertise across disciplines. Investing in advanced technologies and refining collaboration enhanced creativity and efficiency. Guided by our aim to reach more clients and plan for the future, we remain committed to innovation, sustainable growth, and expanding our global impact with visionary architectural solutions.

Vision for the Future:

We aim to drive innovation and sustainable growth by expanding our global presence, embracing cutting-edge technology, and delivering visionary architectural solutions that create lasting impact for our clients and communities worldwide.

Why Choose Us

"We stand apart for our commitment to quality, detail, and collaboration. Every project we undertake is guided by passion and delivered with integrity, ensuring outcomes that exceed expectations."

Choosing **OWA Engineering Consultants** means partnering with a team that combines creativity with technical depth. With experience across residential, commercial, and industrial projects, we bring versatility and confidence to every challenge, no matter the scale. Our approach emphasizes strong client relationships, where open communication and transparency are central to the way we work. From concept to completion, we ensure seamless collaboration between clients, consultants, and contractors, turning complex visions into built reality. Each project is delivered with precision, aligned with international standards, and enriched by a respect for local culture and context. This consistent balance of innovation and reliability has earned us trust, recognition, and a growing portfolio of projects that continue to inspire and stand the test of time.

Tailored solutions designed around your lifestyle and goals

Every project begins with your vision. We take time to understand your needs, priorities, and aspirations, shaping designs that reflect your lifestyle while balancing function and aesthetics. The result is a solution that feels personal, practical, and distinctly yours — crafted with precision to endure over time.

A trusted track record that **ensures confidence** in every detail.

Our reputation is built on delivering projects with vision, quality, and precision. From villas to commercial and industrial developments, we meet expectations with high standards and careful attention to detail — earning the lasting confidence of our clients and partners.

Sustainability is at the very core of every design we create.

Sustainability shapes every project. We focus on efficiency, durability, and responsible practices that reduce impact while enhancing comfort. By applying green strategies and technologies, we create spaces that support a healthier environment and deliver lasting value to our clients and communities.

Work with who you love

We combine creativity with technical expertise to ensure every project is well-planned, compliant, and executed with precision. Our approach balances innovation with responsibility, building trust and creating spaces that inspire confidence for years to come.

Committed to the highest standards of **quality** and compliance.

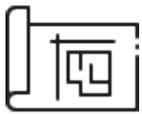

We uphold the highest standards of quality and compliance in every project. From concept to execution, we ensure precision, safety, and accountability. By aligning with international best practices and local regulations, we give clients confidence their projects are reliable, well-designed, and built to last.

Collaboration is at the core of our work. Through open communication and strong partnerships with clients, consultants, and contractors, we ensure clarity, transparency, and seamless coordination.

Our Services

“Delivering integrated architectural and engineering solutions that combine innovation, precision, and practical expertise—transforming complex challenges into sustainable, efficient, and resilient built environments.”

ARCHITECTURAL DESIGN

We believe that great architecture begins with careful planning and a deep understanding of client needs. Our architectural design process involves thorough site and context analysis, creative exploration, and innovative solutions that integrate aesthetics with functionality. Every design is guided by a commitment to sustainability, efficiency, and timeless appeal. By leveraging advanced design technologies and industry-leading practices, we ensure seamless coordination across all disciplines. From the initial concept sketches to detailed construction documentation, our team works closely with clients to create inspiring spaces that reflect their vision while meeting practical requirements.

STRUCTURAL DESIGN

A successful project rests on a strong foundation, and our expertise ensures safety, reliability, and performance are never compromised. Our services cover detailed engineering studies, advanced modeling, and rigorous testing to deliver solutions that align with architectural intent and meet regulatory standards. We focus on durability and cost efficiency, creating structures that stand the test of time while adapting to client needs. From foundations and load-bearing elements to complex frameworks, our engineers provide precision-driven solutions that balance function with form. Through close collaboration with architects, contractors, and clients, we ensure structures that are technically sound, efficient, and built for longevity.

MEP DESIGN

As part of our comprehensive consultancy, we provide MEP (Mechanical, Electrical, and Plumbing) design services that integrate seamlessly with architectural solutions. Our experts focus on optimizing energy usage, ensuring efficient HVAC systems, and implementing reliable plumbing and electrical solutions. Prioritizing functionality, safety, and sustainability, we deliver innovative, compliant designs that enhance overall building performance and long-term value.

AUTHORITY LIASONS

As your authority liaison, we streamline the approval process for various types of projects. Our expert team manages interactions with regulatory bodies, government agencies, and local authorities, ensuring compliance with all necessary approvals. We specialize in navigating complex regulatory frameworks, expediting permit acquisition, and maintaining open communication channels with relevant authorities. With our proactive approach, we minimize delays, facilitating a smooth and efficient approval process for your projects. Count on us to handle the bureaucratic intricacies, allowing you to focus on the core aspects of your business.

From reimagining interiors to engineering resilient structures, we specialize in delivering end-to-end solutions that unify design and function. Our approach blends creativity with precision to achieve results that last.

INTERIOR DESIGN

We specialize in transformative interior design that blends creativity with functionality, ensuring every space is both beautiful and purposeful. Beginning with a deep understanding of client needs, lifestyle, and aspirations, our team develops tailored concepts that maximize spatial efficiency, incorporate stylish and durable finishes, and curate every detail — from lighting and furniture to textures and color palettes — to create cohesive and inspiring environments. By balancing aesthetics with practicality, and integrating sustainable solutions with the latest design trends, we deliver interiors that enhance comfort, reflect individuality, and elevate the overall experience of living and working, whether in residential, commercial, or hospitality settings.

MODIFICATION WORKS

Beyond interiors, we excel in architectural modifications that reimagine and enhance existing spaces with a balance of creativity and technical precision. Our expertise lies in reconfiguring layouts, improving functionality, and introducing design adjustments that elevate both performance and aesthetic appeal. Whether residential, commercial, or mixed-use, we approach every modification with sensitivity to context and client vision, ensuring spaces feel renewed, efficient, and inspiring. By blending innovation with practicality, we transform existing structures into environments that better serve today's needs while remaining adaptable for the future.

LANDSCAPE DESIGN

We specialize in landscape design that enhances the connection between built spaces and their natural surroundings. Our approach combines creativity with environmental sensitivity, shaping outdoor environments that are functional, sustainable, and visually engaging. From private gardens and courtyards to larger commercial and community landscapes, we focus on harmonizing greenery, hardscape elements, and circulation to create inviting spaces. By integrating thoughtful planting strategies, sustainable water management, and aesthetic detailing, we design landscapes that not only enrich the user experience but also add long-term value and identity to every project.

PROJECT MANAGEMENT

We specialize in landscape design that enhances the connection between built spaces and their natural surroundings. Our approach combines creativity with environmental sensitivity, shaping outdoor environments that are functional, sustainable, and visually engaging. From private gardens and courtyards to larger commercial and community landscapes, we focus on harmonizing greenery, hardscape elements, and circulation to create inviting spaces. By integrating thoughtful planting strategies, sustainable water management, and aesthetic detailing, we design landscapes that not only enrich the user experience but also add long-term value and identity to every project.

Team

Our team is the heart of every project. Combining creativity, technical expertise, and collaboration, we work together to deliver designs that inspire, perform, and endure.

AJAY KUMAR

Position : Managing Director

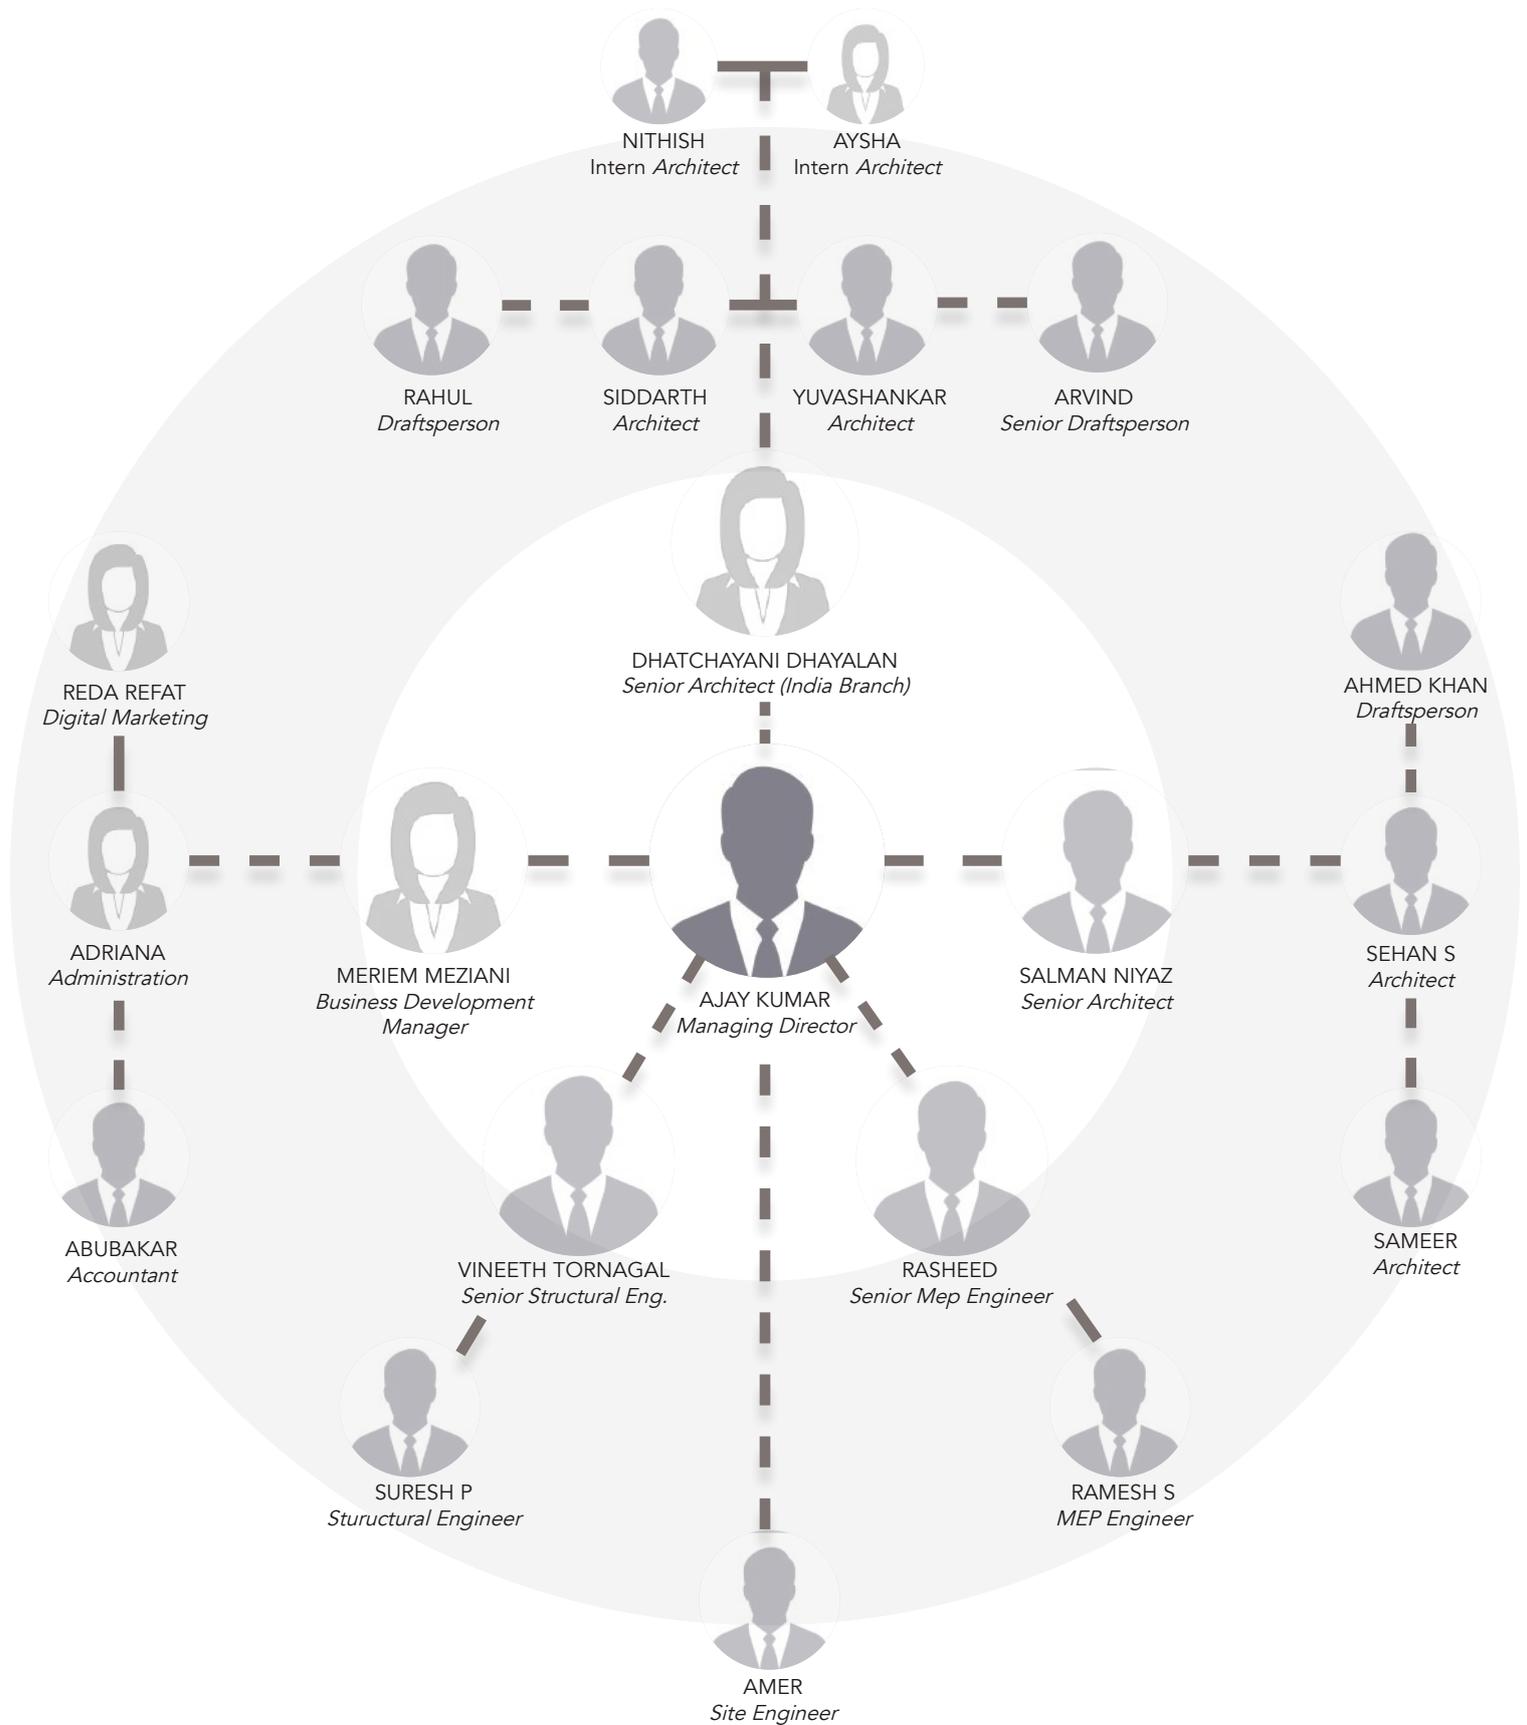

At the heart of OWA Engineering Consultants is a team that blends vision, expertise, and collaboration. Under the leadership of Ajay Kumar, Managing Director, the firm has grown into a dynamic consultancy with a strong reputation for delivering design excellence across the UAE. With over 11 years of experience in architectural design, structural engineering, and project execution, Ajay brings strategic direction and hands-on expertise to every project, ensuring OWA's work reflects both technical precision and creative innovation.

The UAE team is managed by Salman, a specialist in architecture and interior design. His expertise in spatial planning, aesthetics, and client-focused solutions drives the creative strength of our Dubai office. Working closely with a skilled team of architects, engineers, and project professionals, Salman ensures each design is functional, elegant, and aligned with client vision.

Complementing the UAE operations, OWA also operates a satellite branch in Chennai, India, led by Dhatchayani Dhayalan, Senior Architect. With extensive professional experience in the UAE, Dhatchayani oversees a team of seven professionals with deep knowledge of UAE authority regulations and building codes. This strategic extension strengthens OWA's delivery capacity, merging regional expertise with international standards to ensure efficiency, compliance, and innovation across all projects.

Our people are our strength — united by a shared commitment to creativity, quality, and client satisfaction. With diverse skills and a collaborative mindset, the OWA team works as one to transform visions into enduring built environments.

Together, our teams in the UAE and India reflect a culture of collaboration and continuous growth. By combining global perspectives with local expertise, we are able to anticipate challenges, adapt quickly, and deliver solutions that go beyond expectations — ensuring that every project stands as a testament to OWA's values and vision.

Organization chart

Current Works

"This portfolio showcases all of our completed projects, reflecting the vision and dedication behind each design."

Project // 1 - Villa 33

This modern villa design embodies bold architectural expression with a strong emphasis on verticality, rhythm, and transparency, perfectly aligning with the client's vision for a contemporary residence with extensive glazing. The facade features a dynamic composition of geometric forms and material contrasts—sleek white frames, textured dark stone panels, and expansive floor-to-ceiling glass—creating a sophisticated interplay of light and shadow. The generous use of glazing not only enhances natural light penetration but also blurs the boundaries between indoor and outdoor spaces, offering visual continuity and openness. Carefully proportioned elements, clean lines, and a refined palette come together to deliver a striking yet elegant modern home.

Project // 2 - Workspace 05

Located in the heart of Nadd Al Hamr, this modern office building embraces a minimalist design language defined by clean lines, bold volumes, and refined proportions. The architecture features strong horizontal forms punctuated by vertical glazing that brings rhythm, depth, and ample natural light into the workspace.

The fully glazed ground floor creates a transparent, welcoming interface with the street, accommodating communal functions such as a café or co-working lounge. This activates the public edge and encourages engagement.

With a palette of white stucco and sleek aluminum accents, the building expresses a sense of clarity and contemporary elegance, offering a functional yet visually striking presence within the urban context.

STATUS: AUTHORITY SUBMISSION

SCOPE: DESIGN & DEVELOPMENT,
AUTHORITY SUBMISSION,
SITE SUPERVISION

This contemporary villa in Saih Shuaib is designed for a client who values minimalism and clarity. The architecture features clean lines, bold geometry, and refined proportions. Anchored in modernist principles, the design emphasizes strong horizontal volumes and crisp vertical planes, creating rhythm and balance.

The white façade is minimalist yet expressive, with projections and recesses adding depth. Vertical fins on the left frame full-height glazing, while large windows on the right enhance openness and light. Clear glass railings and a sculptural spiral stair add modern character while maintaining simplicity.

The design balances transparency and privacy, with slender trees softening the structure and enhancing its connection to the landscape. The boundary wall is understated, ensuring privacy without disrupting the architectural purity. This villa embodies refined minimalism, natural light, and seamless indoor-outdoor living.

Project // 4 - Villa 38

This villa is conceived in a contemporary modern style, defined by strong horizontal volumes, deep cantilevered slabs, and clean geometric lines that create a striking yet balanced architectural composition. The design emphasizes openness through expansive floor-to-ceiling glazing, blurring the boundary between interior and exterior while ensuring abundant natural light and panoramic views. Vertical fins and textured cladding introduce rhythm and contrast to the otherwise horizontal expression, while a restrained palette of stone, glass, and light-toned finishes conveys elegance and harmony with the natural environment. The interplay of solid stone at the base and floating upper levels enhances the sense of lightness, complemented by multiple terraces and balconies that extend living spaces outward and embrace the surrounding landscape. Minimalist detailing and a focus on proportion complete the villa's refined architectural identity, making it a contemporary landmark rooted in both function and aesthetics.

Project // 5 - Villa 39

This villa presents a refined contemporary architectural language, characterized by its strong symmetry, bold vertical entrance feature, and elegant layering of horizontal volumes. The façade combines expansive floor-to-ceiling glazing with clean rectilinear forms, creating a balanced composition that emphasizes both openness and privacy. A prominent double-height entrance with warm wood detailing serves as the focal point, framed by stone cladding that grounds the design with a sense of solidity. The use of natural textures such as stone, wood, and glass creates a harmonious material palette, while subtle integrated lighting enhances the villa's depth and accentuates its modern geometry. Wide terraces and cantilevered rooflines introduce horizontal rhythm, while landscaped greenery softens the architecture and brings nature seamlessly into the composition. The result is a sophisticated villa that blends modern minimalism with timeless elegance, defined by proportion, material richness, and a strong architectural presence.

Project // 6 - Warehouse 05

Located in the industrial hub of Jebel Ali, this warehouse is designed to maximize storage capacity and operational efficiency, with an emphasis on functionality, durability, and ease of access. Built with a robust steel frame clad in insulated metal panels, it offers strong thermal performance and long-term resilience, while glazed openings along the façade bring natural light and visibility to the workspace. Clearly planned loading zones, wide vehicular access, and a streamlined layout enable smooth high-volume operations, achieving a balance between industrial performance and modern practicality for dynamic commercial needs.

MANAGEMENT

This building exemplifies contemporary luxury architecture, distinguished by its fluid, wave-like balconies that create a dynamic sense of movement across the façade. Expansive glass panels bring in abundant natural light and offer panoramic views, while crisp white frames and dark stone accents emphasize contrast, refinement, and structural rhythm. The integration of greenery along balconies, podium terraces, and rooftop gardens not only softens the form but also reinforces sustainability and a harmonious relationship with nature. At the ground level, a striking entrance portal framed in elegant materials and accent lighting establishes a grand arrival experience, signaling exclusivity and prestige. The podium design further enhances the building's connection to its surroundings, offering landscaped outdoor areas that enrich livability. Crowning the structure, the rooftop garden adds both functionality and beauty, reducing heat gain while providing residents with serene communal spaces. Altogether, the design merges innovation, sophistication, and natural integration, creating a modern residential landmark that delivers comfort, sustainability, and an elevated urban lifestyle.

Project // 8 - Villa 28

This villa presents a refined contemporary architectural language, characterized by its strong symmetry, bold vertical entrance feature, and elegant layering of horizontal volumes. The façade combines expansive floor-to-ceiling glazing with clean rectilinear forms, creating a balanced composition that emphasizes both openness and privacy. A prominent double-height entrance with warm wood detailing serves as the focal point, framed by stone cladding that grounds the design with a sense of solidity. The use of natural textures such as stone, wood, and glass creates a harmonious material palette, while subtle integrated lighting enhances the villa's depth and accentuates its modern geometry. Wide terraces and cantilevered rooflines introduce horizontal rhythm, while landscaped greenery softens the architecture and brings nature seamlessly into the composition. Project // 9 - Villa 42

Nestled in the vibrant community of Al Furjan, this modern villa, spanning a generous 580 square meters, is a masterpiece of contemporary architecture. The villa's plan unveils a visionary concept centered around the intelligent overlapping of spaces, seamlessly weaving efficiency, functionality, and aesthetic allure into every corner. The exterior facade, adorned with clean lines and a harmonious blend of materials including glass, concrete, and wood, exudes a sophisticated simplicity that integrates seamlessly with its surroundings. Expansive windows strategically punctuate the structure, flooding the interiors with natural light and framing picturesque views. The overlapping spatial design extends from the exterior to the interior, where the ground floor orchestrates a symphony of interconnected living, dining, and kitchen spaces. This design ethos not only fosters a sense of unity but also amplifies the villa's overall functionality. The living area effortlessly spills onto a commodious terrace, creating an organic flow between indoor and outdoor realms. The efficiency of space utilization is evident throughout, with smart storage solutions and multi-functional design elements enhancing the villa's livability. The interior decor follows a minimalist yet luxurious aesthetic, characterized by neutral tones, high-quality materials, and carefully curated artistic accents. As a testament to modern living, this villa in Al Furjan stands as a paragon of contemporary architectural excellence, offering a harmonious blend of form and function that elevates the concept of home to new heights.

Project // 18 - Villa 28

Located in Al Khawaneej 01, this villa presents a contemporary interpretation of Islamic architecture, thoughtfully blending traditional elements with modern luxury. The design emphasizes symmetrical proportions, grand arched openings, and intricate detailing that reflect the elegance and spirituality rooted in classical Islamic design. A commanding double-height entrance, framed by sculpted columns and a large arched portal, establishes a majestic sense of arrival.

The villa further integrates geometric patterns, ornamental lighting, and finely crafted ironwork that pay homage to traditional motifs while maintaining a clean, modern aesthetic. Its white façade, enhanced by soft lighting and refined textures, reinforces a dignified and serene presence—resulting in a timeless residence that celebrates cultural identity with sophistication.

SITE SUPERVISION

Project // 19 - Villa 43

TYPE: RESIDENTIAL VILLA (G+1)

DISCIPLINE: ARCHITECTURE &
INTERIORS

SIZE: 8,800 SQ.FT

LOCATION: ABU DHABI

STATUS: SUBMISSION

SCOPE: DESIGN & DEVELOPMENT,
INTERIOR DESIGN

This villa embodies a minimalist contemporary design, defined by clean linear geometry, a monolithic stone-clad façade, and a balanced play of solid and void. Expansive glazing on the ground floor connects indoor and outdoor spaces, while vertical openings above add rhythm, privacy, and natural light. A restrained palette of warm stone and dark accents enhances depth and elegance. Developed as a modification villa, the client entrusted us to redesign the floor plan, elevation, and site plan for a more functional layout and refined architectural expression.

Project // 20 - Urban Residential Tower 02

TYPE: RESIDENTIAL APARTMENT (G+3)

DISCIPLINE: ARCHITECTURE & INTERIORS

SIZE: 216,536 SQ.FT

LOCATION: WARSAN 5

STATUS: UNDER APPROVAL

SCOPE: DESIGN & DEVELOPMENT, INTERIOR DESIGN,
SUPERVISION

This residential building showcases a modern urban design with clean lines, layered horizontal volumes, and recessed balconies that create depth and rhythm across the façade. Expansive glazing ensures natural light and openness, while integrated planters and greenery soften the architecture and enhance its connection to nature. At street level, retail and café spaces activate the frontage, fostering a lively pedestrian environment, while landscaped rooftop terraces extend the living experience outdoors. Combining functionality with contemporary elegance, the design reflects a refined approach to apartment living that balances modern aesthetics with vibrant community life.
